## **ABOUT BURWASH HORTICULTURAL SOCIETY**

The Burwash Horticultural Society was first formed in 1889 to promote an interest in gardening in Burwash and its surrounding area and over the years has drawn membership from all walks of life with perhaps the most famous being Rudyard Kipling who was the society's Vice President in 1911.

It is an active society with over 80 members and with a very low subscription, new members are always most welcome.

The three shows we hold a year are easy to enter with prize money, certificates and cups for the winners. Our shows generate a great deal of interest in the village and are well attended. See the back page for other events we put on too.

This schedule together with a newsletter are sent out to members at the start of the year and extra copies are available from The Flower House.

## **THE MEMBERSHIP YEAR IS FROM 1/1 - 31/12**

Subscriptions £3.00 Per Annum

The AGM will take place on the 3rd Tuesday of March each year

## **Membership Benefits**

Attendance at talks is £3 for non-members, £2 for members.

## **Other information**

Please note that we have increased the cost of entering a class to 30p. This is the first increase in a considerable number of years.

Streptocarpus will be the subject of our regularly changing class 30 in the Rose and Sweet Pea Show. However, this year will be a bit different and not everyone will be able to enter. Please see page 22 for further information. If this is successful, we may consider using this format from time to time. Ideas from our members for this class are always welcome and will be discussed by the committee for future shows.

The trip to the Grade 2 listed Beth Chatto Garden near Colchester in north Essex will take place on Thursday 27 June 2024. <https://www.bethchatto.co.uk/> will give more information on what you can expect from this grade two listed garden. Burwash Horticultural Society will be subsidising the cost of the coach for members therefore the cost, including the £12 entry fee, will be £20 for members and £22 for non-members. Nearer the time, further details will be put onto the Society's Website.

<https://www.burwashhorticulturalsociety.co.uk/>

Please do look at our website, each month there are hints and tips to consider for gardening as well as interesting information relating to wild life plus information about the new biodegradable oasis now available for using to display flowers in show vases.

## HINTS FOR EXHIBITORS IN THE FLOWER CLASSES

**Competitors, especially those who have not exhibited before, may find these explanatory notes helpful in the selection and presentation of their exhibits.**

Give careful attention to proper staging (presentation) of exhibits. Society vases, where their use is required, are made available on the day of the show. Whenever possible, an exhibit of a plant, flower, vegetable or fruit should be named as this adds greatly to the gardening interest of the show. No penalty will be attached to unnamed exhibits. All flower exhibits should be presented with a leaf from the plant. Any enquiries prior to the show should be addressed to the Chairman or Vice Chairman. On the day of the show, Stewards will be on hand to help anyone who has difficulty in finding a class location or interpreting a class description.

### Presentation

Flowers should be in good condition, i.e. at their most perfect stage and as fresh and free from damage due to weather, pests and diseases as possible.

**Blooms should be so placed in the container that each one can be seen easily by the judge, and not arranged as if in a flower arrangement class. To anchor the stems in the vase, use wet moss, bio-oasis [see our website for more details], kitchen paper etc, which should not come above the rim of the container.**

A vase is higher than its width and a bowl is wider than its height. A container can be any receptacle that holds flowers. In floral art classes please be aware of the height, width and depth restrictions. NOTE: IN ALL FLOWER CLASSES, IF THE DESCRIPTION IS FOR A SINGLE BLOOM ALL SIDE BUDS SHOULD BE REMOVED.

In judging the merits of vegetables, consideration is given to:

**CONDITION:** cleanliness, freshness, tenderness and freedom from coarseness and blemish.

**SIZE:** size increase must be accompanied by culinary quality.

**UNIFORMITY:** in size, shape and colour

### Definitions

**Cultivars:** The term 'cultivar' in place of the more general term 'variety' is being increasingly accepted by gardeners in accordance with RHS recommendations. A 'cultivar' (a cultivated plant) is a plant variant or selection, produced by man in cultivation, the characteristics of which are maintained by controlled seed or vegetative production, e.g. "Gardeners Delight" is a cultivar of the *Lycopersicon esculentum* – tomato.

**Variety:** A 'variety' is the botanical term for a naturally occurring variant of a species, i.e. *Geranium sanguineum* var. *stratum*

**Kind:** The term 'kind' is used in the classification of fruit and vegetables for show purposes, e.g. parsnips, carrots and cabbages are 'kinds' of vegetables, while apples, plums and gooseberries are 'kinds' of fruit.

## Information on Dahlia Classification

To enable exhibitors to enter the correct class, please use the following classification rules.

### Cactus Types

CACTUS

SEMI-CACTUS

**Incurved Cactus** Petals rolled for their full length, with tips of the petals curving toward the centre of the flower.

**Semi Cactus** - Petals flat at the base, with less than half of the petals rolled or quilled

### Decorative Types

FORMAL DECORATIVE

INFORMAL DECORATIVE

**Formal Decorative** - Flat petals with an even, regular placement throughout the flower

**Informal decorative** - generally flat petals, sometimes slightly rolled at the tip, but with irregular arrangement of formation

## HOME PRODUCE - Advice on presentation

1. Read the schedule carefully to make sure you exhibit the correct size and numbers of items
2. Plain white paper plates should be used for presenting items except bread, which should be on a board and rolls in a basket. Doilies may be used for sweet items.
3. Savoury tarts, quiches and flans should be removed from their baking tins.
4. Fluted cutters should be used for sweet items e.g. jam tarts/fruit scones and plain cutters for savouries e.g., cheese scones/oatcakes.
5. A small garnish can improve the look of an item.
6. All preserves should be presented in sterilised jars and sterilised plain lids and labelled with the variety and full date it was made. [Jars and lids with trade names are not acceptable as they contravene the Trade Description Act].
7. When potting, jars should be filled to the brim to allow for shrinkage when cold. Lids or waxed discs (shiny side down) should be applied while preserve is hot. If using cellophane lids, these should be applied when the jars are cold.
8. Wax discs and cellophane can be used for fruit curds as they have a short shelf life (3-4 weeks).
9. Vinegar preserves must be covered with non-corrosive lids and indicate pungency of contents (Hot/mild/spicy etc.) on the label. The flavours of pickles and chutneys develop as they mature. Items should be at least 2 months old before exhibiting.

### **Instructions for class 30, 2024 Rose and Sweet Pea Show**

**See page 21**

#### **Streptocarpus**

Over the last few years, class 30 in the Rose and Sweet Pea Show has had changing subjects that are just a bit out of the ordinary. We have had a scarecrow, miniature garden and the last two years a display of succulents. This year it will be Streptocarpus. This easy to grow and very floriferous house plant was made available at the September talk of 2023, as seedlings and sold to the attendees to grow on and display at the 2024 Rose and Sweet Pea Show to be held on 8 June 2024. Entry to this class will be for those with the numbered voucher obtained when buying the plant. Society rules 3, 4 and 5 apply particularly [please see page 5]

|----|--------------------|----------------------------------------|
| 62 | My favourite thing | (Max 7"x 5" May be mounted on 9" x 7") |
|----|--------------------|----------------------------------------|

### Ingredients

250 ml cider vinegar  
100g golden caster sugar  
300g chopped rhubarb  
4 chopped medjool dates  
1 tsp grated ginger  
1 cardamon pod

### Method

In a pan, heat the cider vinegar and caster sugar until the sugar has dissolved.

Add the chopped rhubarb, dates, ginger and cardamom pod and cook for 15-20 minutes or until the rhubarb has broken down and the liquid has reduced to a thick chutney

*Will keep in a sterilised jar for three months in a cool, dark place.*

## Ingredients

125g unsalted butter, cubed, plus extra for the tin  
175g light brown soft sugar  
200g raisins  
200g sultanas  
100g currants  
50g mixed peel  
225g self-raising flour  
1 ½ tsp mixed spice  
½ tsp bicarbonate of soda  
Pinch of salt  
2 eggs, beaten

## Method

### Step 1

Heat the oven to 160C/140C fan/gas 3  
Butter and line a 900g loaf tin with baking parchment.  
Melt the sugar, butter and 225ml water in a large saucepan.  
Once melted add the raisins, sultanas, currants and mixed peel.  
Bring to a gentle boil, and stirring occasionally, cook until reduced and softened, around 10 – 15 minutes.  
Remove from the heat and leave to cool to room temperature.

### Step 2

Tip the flour, mixed spice, bicarbonate of soda and a pinch of salt into a large bowl.  
Add the cooled fruit mixture and stir, then add the eggs and mix to combine.  
Bake for 45 – 55 minutes until dark brown and a skewer inserted into the middle comes out clean.  
Leave to cool in the tin for 10 minutes, then transfer to a wire rack to cool completely.

One of our committee members saw this in another society's show. The whole committee agreed that this would be an interesting option for Class 24 in the Summer Show [on page 24], which is regularly changed.
